

2017 WINTER WORKSHOP FREIGHT FOR FLORIDA

The Florida Section of ITE is pleased to announce the **2017 Winter Workshop** will focus on **freight practices in Florida**. **The freight industry has become a game-changer in the State of Florida over the past decade regarding economic and transportation vitality. Please join us to learn more about trends and happenings in this evolving field.**

Background: Recognizing the significant role freight mobility plays as an economic driver for the state, FDOT Office of Freight, Logistics and Passenger Operations was created in December 2011.

Working collaboratively on multimodal initiatives, the office includes the:

- Aviation and Spaceports Office;
- Rail and Motor Carrier Operations Office;
- Seaports and Waterways Office; and
- Transit Office.

These offices also serve as a tool to better connect, develop, and implement a planning process to maximize the use of the existing facilities and to integrate and coordinate the various modes of transportation, both government-owned and privately-owned resources.

Topics: The workshop will cover the following topics.

- Statewide Freight Perspective
- Trade & Logistics: Understanding the Industry
- Modal Systems Plans Update
- I-4 Corridor Freight Perspective
- Freight Roadway Design Considerations
- Freight Industry Practices and Concerns
- Project Planning Applications – Freight Data Sources and Trip Estimation
