Vice-chair for outreach

Transportation Planning Division, American Planning
Association

On the Horizon: State of Transportation Planning 2016

https://issuu.com/futuremodes/docs/sotp_final_03.18.16

What's on the horizon?

Current technology continues to develop. It all needs to be “smart.”

Engineers and planners should be aware of a few concepts

- Connected vehicles
- Freight planning and project development
- New technology for data collection

What else is over the horizon?

- Backlash
- Disruptive mobility
- Paying for refitting infrastructure. What design are appropriate for retrofit without breaking the budget?

Responding strategically

Better collaboration between planners and engineers.

Maintaining infrastructure and finding room for other modes.

Questions?
